**Igniting a mass movement for
abortion rights in a post-Dobbs world**

What would it look like for an entire society to be thrown down in the struggle for women's liberation, together? For this **International Women's Day, March 8, 2026**, we're taking out this new editorial which exposes the bloody fallout of abortion bans since 2022 and calls for a militant women's movement to take back our reproductive freedom.

"Our oppression will not be resolved by building a parallel, underground reproductive health service and DIYing our medical care. It's not possible, and we shouldn't have to accept that we can only access abortion in hiding. **The point is to fight back against the entire Christian nationalist, revanchist package being forced on us, overthrow this rotten empire, seize state power and use it to enshrine and enforce the right to safe and legal abortion, and build a new, socialist society of which women are equal architects.**"
